UNDERWATER POOL & SPA LIGHT

Model WN250

Australian Patent
Australian Design Registration
U.S.A. Design Registration

LIGHT - Degree of Protection IPX8 to 1.2m.
Complies with AS 1939.

TRANSFORMER TO SUIT: - Degree of
Protection IP24. Complies with AS 3108.

- ✓ 20 metres of heavy duty 4mm² cable to reduce voltage drop and ensure maximum light output.
- ✓ Interchangeable coloured lenses available in blue, green, red, magenta and clear.
- ✓ Choice of rim colours including white, black, ivory, grey or stainless steel to match your pool or spa interior.
- ✓ Compact diameter 164mm for concrete installation, 174mm for fibreglass installation.
- ✓ Recessed design for minimal projection into the pool 18mm for concrete installation, 22mm for fibreglass installation.
- ✓ Extra low voltage - High quality 12 volt 100 watt quartz halogen globe with ceramic connector.
- ✓ Slotted rim allows water to flow around light, to eliminate stagnant water and to aid cooling.
- ✓ Suitable for concrete or fibreglass pools.
- ✓ Light locked into position with bayonet tabs for easy servicing.
- ✓ Unique electrical connection, so power cable does not intrude into light cavity - eliminates possible source of water entry.
- ✓ Designed and manufactured in Australia.
- ✓ Spa Electrics Pty Ltd is a fully Australian owned company.

CAUTION:

LIGHT MUST BE WATER COOLED AT ALL TIMES. DO NOT SWITCH LIGHT ON UNTIL INSTALLATION IS COMPLETE AND LIGHT SUBMERGED FULLY IN WATER.
